

The Taiwan-Philippines Summit on Active Volcanoes, Earthquakes, Marine and Environmental Disasters

18th – 20th June, 2024

Department of Earth and Environmental Sciences, National Chung Cheng University, Taiwan

Introduction

Natural disasters such as volcanic eruptions, earthquakes, tsunamis, and environmental catastrophes significantly impact the lives and ecosystems of regions worldwide. Taiwan and the Philippines are particularly vulnerable to such events due to their geographical locations along the Pacific Ring of Fire. Hence, organizing an international conference focused on understanding and managing these disasters in the context of Taiwan and the Philippines is of paramount importance. This coming June, the Department of Earth and Environmental Sciences at National Chung Cheng University (CCU-EES) will host the Taiwan-Philippines Summit on Active Volcanoes, Earthquakes, Marine, and Environmental Disasters in Chiayi, Taiwan. We aim to bring together earth and environmental science researchers from different institutes all over Taiwan and the Philippines for this knowledge exchange.

Main Topics

1. Tectonics
2. Geochemistry
3. Environmental Science
4. Seismology
5. Petrology
6. Volcanology
7. Geophysics

Venue

Earth Museum,
Department of Earth and Environmental Sciences,
National Chung Cheng University
No.168, Sec. 1, University Rd., Minhsiung, Chiayi 621301, Taiwan (R.O.C.)

Important Dates

- | | |
|----------------------------|-------------------------------------|
| May 15, 2024: | Abstract submission date deadline |
| May 20, 2024: | Notification of abstract acceptance |
| June 17, 2024: | Registration |
| June 18 – 19, 2024: | Scientific presentations |
| June 20, 2024: | Fieldwork |

Organizers

National Chung Cheng University
National Cheng Kung University
National Central University

Partners

University of the Philippines-Diliman
University of the Philippines- Los Baños
Philippine Institute of Volcanology and Seismology
